### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The applicant claims a frictional feeder comprising a device used to rotate a locked frictional surface in order replace a worn section of the frictional surface with a new section. The device includes a polygonal locking member that slides on a longitudinal section of a shaft between a first portion and a second portion. When the locking member is located in the first portion, one of the facets of the polygonal locking member is in contact with a blocking member, and thereby prevents the shaft from rotating. When the locking member is located in the second portion, the locking member is free from the blocking member and is therefore rotatable along with the shaft about a longitudinal axis. The examiner was unable to find a reference among the prior art that teaches such a device comprising a locking slidable locking member and blocking device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kaitlin S. Joerger whose telephone number is 571-272-6938. The examiner can normally be reached on Monday - Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Walsh can be reached on 571-272-6944. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
